

• Early access · a small number of spots

Early access for firms that can't afford missed claim calls

Every missed call is a claim a homeowner may hand to the next firm that picks up. Textback answers instantly, asks the first intake questions, and gets you a ready-to-call summary — before you're back at your desk.

If your firm runs on inbound policyholder calls, a missed one after hours or during storm volume isn't a small thing. It's a claim you never got the chance to work.

What early access includes

- ✓ ClaimCascade Textback live on your existing number
- ✓ Direct setup help from the team building it
- ✓ First access to new modules as they ship
- ✓ Founding-partner pricing locked in
- ✓ No long contract

This isn't a full rollout. It's a small, hands-on group of firms we work with directly while Textback earns its way into the rest of the platform.

Why we're keeping it small

- We want real workflow feedback
- We're onboarding firms directly
- Built customer-funded, module by module

Best fit

- Independent public-adjusting firms
- Firms that rely on inbound policyholder calls
- Teams that miss calls after hours or during storm volume
- Owners who want better intake without adding headcount

CONTRACT
